Conference

**The research on extra-European thinking in Poland:
traditions - state of affairs - prospects**

14 June 2021

The aim of the conference is to sketch a map of the research on extra-European thinking in Poland, to gain a preliminary orientation as to its main points of interest and methods, to place it against the background of existing research frameworks, both Polish and international, as well as to design conferences and publications on key world problems (such as relations with nature, interpersonal relations of social friendship and fraternity) in relation to the traditions of thinking of different cultures. The meeting at the conference could also contribute to highlighting the world-citizen aspect in Polish thought.
